

# Advancing Education with Technology

## Helping You Transition to Common Core Standards

We know that you're probably working with your district or school to plan for the implementation of Common Core State Standards. With award-winning technologies and professional development, Vantage Learning can help make that transition quick, efficient and cost-effective. We'll work with you to:

- Align the CCSS with your own standards and blend them to help **build** a curriculum.
- Deconstruct each of the Anchor Standards, and associated objectives, to enable you to **spiral** your curriculum to address the requirements needed for each individual student.
- Create a **scaffold** curriculum to ensure that every standard and objective builds a knowledge base for each student to move to the next level of difficulty.
- Assist your teachers in implementing these standards to **ensure success**.

**Please contact us for a complimentary consultation.  
We're here to exceed your expectations!**
