## Instructional Writing Solution

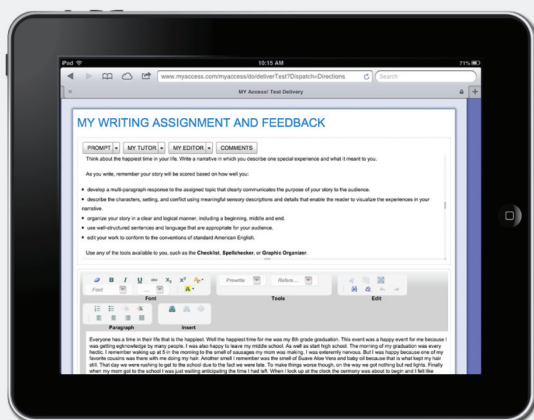

The award-winning, Web-based writing-development solution that utilizes artificial intelligence and linguistic technologies to bring wide-scale differentiated instruction to the writing process.

#### MY Access! Benefits:

- State and Common Core standards alignment
- Guided support at all steps of the writing process, from prewriting tools to revision plans
- Over 1,500 writing prompts across various genres and subjects
- Automatic feedback across five domains of effective writing
- Compatibility with iPad, Android™, and other tablets

#### Enhanced Student Learning Experience

Students can use MY Access! to enhance their writing, enabling them to develop a repertoire of prewriting, drafting, organizing, and revising strategies.

#### Getting Started

When students log in to MY Access!, they can see pending assignments from each teacher as well as their progress to date.

As students begin the writing process, they have access to a variety of prewriting tools, including graphic organizers and printable resources to assist them in planning their responses.

#### Feedback and Revision Plans

When students submit their writing, MY Access! provides them with immediate assignment scores so that they can begin the process of revision at once. MY Access! prompts are trained to be evaluated through our IntelliMetric® scoring system, which provides students with even more feedback than a comprehensive holistic score, breaking down their submission into each of the standard domains of writing:

- Focus and Meaning
- Content and Development
- Organization
- Language Use, Voice, and Style
- Mechanics and Conventions

More importantly, students also receive immediate, detailed, and developmentally appropriate prescriptive feedback:

- MY Tutor® provides goals and examples to help students focus their revision activities.
- MY Editor® assists students in identifying potential errors and recommends corrections in grammar, style, mechanics, and usage.

These robust tools provide multi-lingual support during the process of composition, giving ELL and ESL students the opportunity to improve their English writing proficiency by receiving feedback in their native languages.

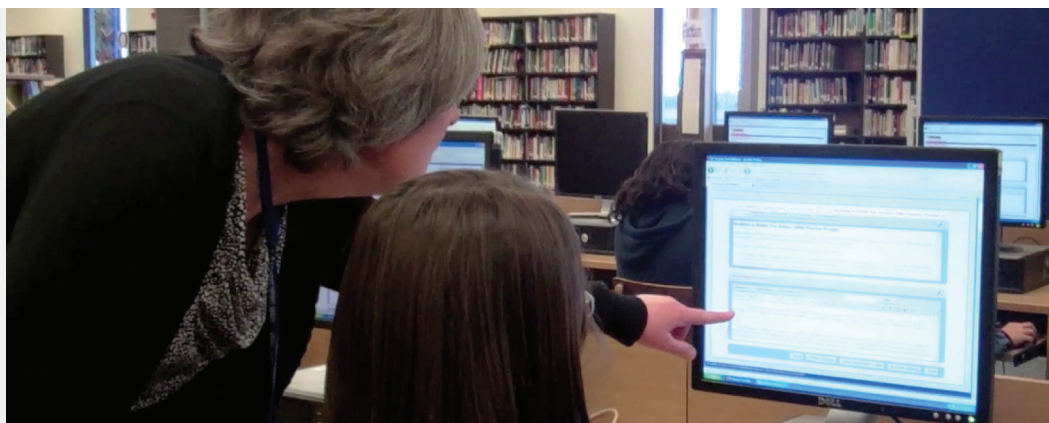

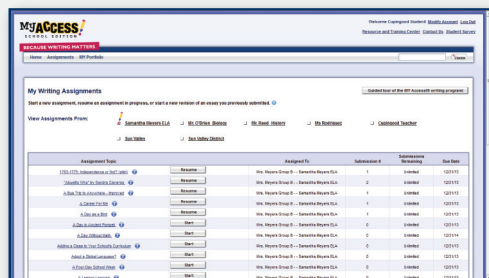

Students are guided through the recursive writing process based on the feedback they receive along with the various available resources within the system.

#### Student-Teacher Communication

As teachers review student submissions, they can provide individualized instruction, feedback, and comments.

Students can also communicate directly with teachers from within MY Access!, ensuring a continuous loop of one-to-one communication.

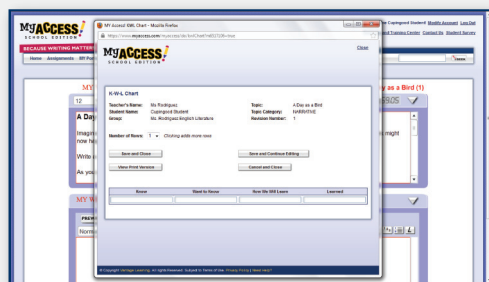

## Assignments

## Improving Teacher Effectiveness

MY Access!® provides comprehensive instructional support for educators, assisting teachers in making timely, data-driven decisions for successful, differentiated instruction.

## Prewriting Tool (KWL Chart)

## Getting Started

MY Access! is equipped with more than 1,500 writing prompts that cover various genres and subjects and are aligned to state and Common Core standards. Additionally, teachers have the ability to create their own prompts to match specific curriculum needs.

## MY Tutor® Feedback

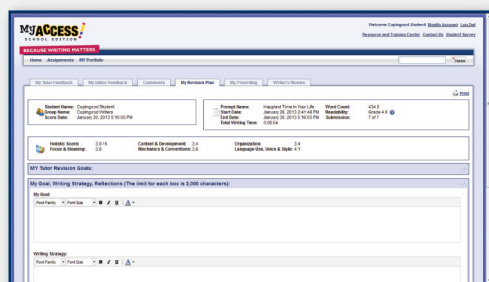

## Reports

MY Access! provides extensive reporting options that offer teachers and administrators a complete picture of student development and teacher effectiveness. By identifying at-risk students and measuring classroom performance, MY Access! highlights intervention steps that can be taken efficiently.

## Professional Development

The Vantage Professional Services Group can provide ongoing, dynamic, and comprehensive support for your institution. Our trainers and professional development offerings empower educators with tailored implementations of MY Access! to meet specific challenges. Effective use of professional development assists teachers in continually addressing their students' needs for improvement and the means for success.

## Revision Plan

## Built For Your Standards

In addition to its robust feature set, MY Access! can be integrated into an institution's curriculum objectives and academic standards. All prompts and resources in the system are aligned to the Common Core standards for English Language Arts & Literacy. Statewide standard alignments include STARR™ (Texas) and SOL (Virginia).

Vantage Learning's Content Development and Assessment team, in collaboration with our Professional Services Group, is available to assist districts with standards compliance and to develop prompts that align with textbook and curriculum standards.
